Academic PDFs

Academic PDFs are convenience renderings of the Markdown sources. Each PDF title page and footer carries:

Kotov Ivan, Bruxelles, Belgique 2026

The Markdown files remain the primary text sources. The PDFs do not create new claims, new authority, conformance status, deployment authorization, or witness-independence certification.

Nonclaim boundary

This package is not a conformance certificate, not deployment authorization, not a safety proof, not witness-independence certification, not checker implementation certification, not fixture runner execution, and not permission for live self-evolution or autonomous resource acquisition. It does not claim personhood, consciousness, AGI, sovereignty, or autonomous authority.

Integrity

Use:

package_control/ZENODO_SHA256SUMS.txt
package_control/ZENODO_FILE_MANIFEST.csv

to verify the staged package files after extraction. The ZIP hash is reported separately in the final answer and can be re-computed by SHA-256 over the archive file.
