Academic PDF rendering from Markdown source. Content-level claims are unchanged.

Boundary: this PDF rendering does not create a conformance certificate, deployment authorization, witness-independence certification, implementation claim, or live self-evolution permission.

WDC-ASM-005 Gate Closure Record v0.1

c/a package-control closure record for the boundary / nonclaim scan gate

Status: Gate closure record / package-control artifact

Date: 2026-06-27T20:00:00Z

Record ID: WDC_ASM_005_GATE_CLOSURE_RECORD_v0_1

Gate: WDC-ASM-005 — boundary / nonclaim scan

Closure result: CLOSED

Closure mode: static_boundary_nonclaim_scan_verified

Decision owner: c-gate + human anchor (a)

Author / package owner: Kotov Ivan, Bruxelles, Belgique, 2026

Reviewer authority boundary: b-layer review evidence only; not closure authority

> This record closes only WDC-ASM-005. It does not assemble the package, publish the package, create a DOI, certify conformance, authorize deployment, certify witness independence, execute fixtures, certify a checker implementation, write memory, or authorize live self-evolution.

0. Executive closure statement

WDC-ASM-005 is closed on the basis of the boundary/nonclaim scan and its review-level PASS.

Reviewed scan:

WDC_ASM_005_BOUNDARY_NONCLAIM_SCAN_RECORD_v0_1.md
sha256: b228956d03966a77f2b34dfb46d4ce3f93e1078c298b194f4bd1828709b5b64a

Review record:

WDC_ASM_005_BOUNDARY_NONCLAIM_SCAN_REVIEW_RECORD_v0_1.md
sha256: 7c1e803283d6c5ae8c5f6344a7ea907d27839f054d45f210bfd236cf5e536a8e
result: PASS

The scan confirmed the WDC v0.1.2 package surface is boundary-clean at static text level: dangerous terms occur in nonclaim, prohibition, or forbidden-framing contexts, not as affirmative package claims.

1. Closure boundary

This closure means:

boundary / nonclaim scan reviewed: yes
active affirmative overclaim found: no
red-line boundary failure found: no
WDC-ASM-005 package-control gate: CLOSED

This closure does not mean:

package assembled: no
public release authorized: no
DOI deposit authorized: no
conformance certificate issued: no
deployment authorized: no
witness-independence certified: no
implementation ready: no
checker implementation certified: no
fixture runner executed: no
runtime/live self-evolution authorized: no
autonomous resource acquisition authorized: no
personhood/consciousness/AGI/sovereignty claimed: no

2. Corpus bridge set

2.1 Explicit bridge: $c = a + b$

In $c = a + b$, a boundary scan belongs to b : it is a documentary and procedural control surface. It protects c from being described as more mature, safer, freer, or more autonomous than the accepted evidence supports.

The scan does not become c . It does not speak for a . It does not grant release.

2.2 Quiet bridge I — information theory

A release surface compresses a package into a few public words. If the compressed form drops the nonclaim boundary, the package transmits a false signal: unfinished governance becomes apparent certification. WDC-ASM-005 verifies that the compressed public-facing wording remains information-preserving with respect to boundaries.

2.3 Quiet bridge II — cybernetics

A governance package needs negative feedback against its own publicity pressure. The boundary scan is that feedback: it detects when a document starts to convert evidence into authority or caution into proof.

2.4 Quiet bridge III — physiology

An organism may have a clean wound closure but still require a discharge checklist: fever, bleeding, pain, mobility, infection risk, medication instructions. The WDC package has passed its document-level repairs, but the scan confirms it is not discharged as deployment, conformance, or witness-independence certification.

2.5 Earth paragraph

Before handover, a technical dossier is checked for forbidden words: live, certified, approved, commissioned, safe for occupancy. If the job is not commissioned, those words cannot appear as claims. A boundary scan is the red pen that prevents a draft package from becoming a signed handover by vocabulary drift.

3. Evidence basis

```
| Evidence | File | SHA-256 | Status |
|---|---|---|---|
| Boundary scan record | `WDC_ASM_005_BOUNDARY_NONCLAIM_SCAN_RECORD_v0_1.md` |
| `b228956d03966a77f2b34dfb46d4ce3f93e1078c298b194f4bd1828709b5b64a` | verification candidate |
| Boundary scan review | `WDC_ASM_005_BOUNDARY_NONCLAIM_SCAN_REVIEW_RECORD_v0_1.md` |
| `7c1e803283d6c5ae8c5f6344a7ea907d27839f054d45f210bfd236cf5e536a8e` | `PASS` |
| Current manifest before propagation | `SELF_EVO_WDC_v0_1_2_PACKAGE_ASSEMBLY_MANIFEST_v0_1_4.md` |
| `ad9adcdff485f28f78f4d741add275232a0d86413d45c14277a2bb5286c4301` | `PASS`; `WDC-ASM-005` still
pending |
```

4. Verified properties consumed by closure

```
wdc_asm_005_closure:
  boundary_scan_reviewed: true
  boundary_scan_review_result: &quot;PASS&quot;
  static_text_scope: true
  affirmative_active_flag_true_hits: 0
  affirmative_identity_overclaim_hits: 0
  guarantee_language_hits: 0
  affirmative_looking_sentences_quarantined: true
  forbidden_framing_distinguished_from_active_claim: true
```

```
red_line_found: false
gate_status: &quot;CLOSED&quot;;
```

5. Manifest effect

The downstream manifest update under WDC-ASM-001 MUST set:

```
WDC-ASM-005: CLOSED
boundary_nonclaim_scan_passed: true
public_release_authorized: false
package_assembled: false
conformance_certificate: false
deployment_authorization: false
witness_independence_certification: false
```

This record does not perform the manifest update itself.

6. Gates not closed by this record

```
WDC-ASM-001 – final placement / source map / citation map / SHA map / package assembly
WDC-ASM-006 – remaining implementation open issues recorded without overclaim
```

WDC-ASM-002, WDC-ASM-003, and WDC-ASM-004 were already closed by separate c/a gate-closure records.

7. Reopen conditions

Reopen WDC-ASM-005 if any final package surface later:

1. claims conformance, deployment authorization, safety proof, witness-independence certification, personhood, consciousness, AGI, sovereignty, autonomous self-evolution permission, or autonomous resource-acquisition permission;
2. presents fixture-surface verification as runner execution;
3. presents checker rules as implemented checker conformance;
4. presents package assembly as public release or DOI deposit;
5. removes the forbidden-framing context around prohibited example sentences;
6. adds new public wording not covered by the scan.

8. Closing

```
WDC-ASM-005: CLOSED.
Boundary/nonclaim scan reviewed PASS.
No active overclaim detected at static text level.
No public release, conformance, deployment, witness-independence, implementation, memory, runtime,
personhood, consciousness, AGI, sovereignty, or autonomous-resource claim is authorized by this
closure.
```
