# SECR-WDC Delta Patch Notes v0.1.1

## Patch notes for 09\_Self\_Evo\_Contradiction\_Register\_WDC\_Delta\_v0\_1\_2\_v0\_1\_1

Status: Patch notes / control-layer artifact (advisory)

Date: 2026-06-27

Patch notes ID: SECR\_WDC\_DELTA\_PATCH\_NOTES\_v0\_1\_1

Patched artifact: 09\_Self\_Evo\_Contradiction\_Register\_WDC\_Delta\_v0\_1\_2.md

Corrected artifact: 09\_Self\_Evo\_Contradiction\_Register\_WDC\_Delta\_v0\_1\_2\_v0\_1\_1.md

Patch reason: close SECR-WDC-DELTA-REV-F1 from SECR\_WDC\_DELTA\_REVIEW\_RECORD\_v0\_1.

## 0. Boundary

These patch notes do not mutate the DOI-bound Self-Evo v0.1.1 package and do not release v0.1.2.

They record an append-first correction to the WDC contradiction-register delta.

## 1. Review finding addressed

SECR-WDC-DELTA-REV-F1  
DOC / status\_summary\_inconsistency  
severity: S2

The review found that §7.1 and §7.2 did not reconcile:

§7.1 summary total: 13  
§7.2 register entries: 12  
status vocabularies differed  
status and gate-effect values were partially conflated

## 2. Changes made

### 2.1 Header and correction note

Updated the corrected artifact to an append-first v0.1.1 revision:

09\_Self\_Evo\_Contradiction\_Register\_WDC\_Delta\_v0\_1\_2\_v0\_1\_1

Added a v0.1.1 correction note stating that this patch closes SECR-WDC-DELTA-REV-F1 without changing contradiction substance.

### 2.2 Status vocabulary unified

The WDC contradiction register now uses exactly this status vocabulary in both §7.1 and §7.2:

RESOLVED  
PATCHED  
IN\_PROGRESS  
WATCH

Gate effects are no longer used as status values.

### 2.3 Summary count corrected

The §7.1 summary now totals exactly twelve register entries:

RESOLVED: 4 -&gt; 004, 005, 006, 007  
PATCHED: 2 -&gt; 001, 003

```
IN_PROGRESS: 3 -&gt; 002, 010, 012
WATCH: 3      -&gt; 008, 009, 011
OPEN hard contradiction: 0
```

Total: 12

## 2.4 Gate-effect column separated

The §7.2 table now keeps Status and Gate effect separate.

Examples:

```
SE-CONTRA-WDC-002:
  status: IN_PROGRESS
  gate effect: blocks-release until harmonized
```

```
SE-CONTRA-WDC-003:
  status: PATCHED
  gate effect: blocks-release until verified
```

```
SE-CONTRA-WDC-012:
  status: IN_PROGRESS
  gate effect: blocks-release until boundary scan passes
```

## 2.5 Related open issue aligned

SE-OI-WDC-007 now uses IN\_PROGRESS instead of WATCH, matching the SE-CONTRA-WDC-012 status and the pending boundary/nonclaim scan.

## 2.6 Closure map added

Added §17.1 review-finding closure map:

```
SECR-WDC-DELTA-REV-F1 -&gt; CLOSED BY TEXT
```

## 3. Unchanged surfaces

This patch does not change:

```
contradiction IDs
contradiction severity values
contradiction descriptions
required handling semantics
WDC invariants
WDC red-line set
canonical 04 vocabulary
03 packet enum authority
07 WRCG/CST projection gate
SELF-EVO-10 handoff logic
package-assembly gates
release/nonclaim boundary
```

## 4. Result

The corrected register now has internally consistent bookkeeping:

```
12 register entries.
12 status-summary count.
1 status vocabulary.
Gate effect separated from status.
No new contradiction semantics introduced.
```

Recommended next review artifact:

```
SECR_WDC_DELTA_REVIEW_RECORD_v0_1_1.md
```
