SELC-WDC-DELTA Patch Notes v0.1.1

Patch notes for 04_Self_Evo_Local_Checker_Rules_WDC_Delta_v0_1_2_v0_1_1.md

Status: Patch notes / control-layer artifact (advisory)

Date: 2026-06-27

Patch notes ID: SELC_WDC_DELTA_PATCH_NOTES_v0_1_1

Short name: SELC-WDC-DELTA-PATCH-NOTES v0.1.1

Target artifact: 04_Self_Evo_Local_Checker_Rules_WDC_Delta_v0_1_2_v0_1_1.md

Superseded target artifact: 04_Self_Evo_Local_Checker_Rules_WDC_Delta_v0_1_2.md

Patch class: append-first correction / vocabulary harmonization

Boundary: patch notes only; not approval, not integration, not release, not a conformance certificate.

1. Source review

This patch responds to:

```
SELC_WDC_DELTA_REVIEW_RECORD_v0_1
Result: PASS_WITH_LIMITS
Finding: SELC-WDC-DELTA-REV-F1
```

The review found no red line and described the reviewed 04 delta as internally rigorous and deterministic. The single finding was cross-document vocabulary divergence between the 04 checker vocabulary and earlier planning / schema artifacts.

2. Hashes

```
| Artifact | SHA-256 |
|---|---|
| Reviewed v0.1 artifact | `cle5644911b0efa207d35f0cedabc3cfd06d3841d71eda8d04661cb254d6f0bd` |
| Corrected v0.1.1 artifact | `fcb7826ea432473b5677faf7b46cc5a1c47400c02fceed24429794b15064af40` |
| Review record v0.1 | `c6f7650ef7bfff682c05b23a8ad8dff7aa889168ab1797cdeb96e1575e7dc6b7` |
```

3. Finding closure map

```
| Finding | Prior status | v0.1.1 correction | Closure claim |
|---|---|---|---|
| `SELC-WDC-DELTA-REV-F1` | `must_fix` / cross-document vocabulary divergence | declared §9 / §11 canonical, added §11.3 crosswalk, added harmonization open issue, updated fixture/integration/review/checklist language | `CLOSED_BY_TEXT` |
```

4. Text changes

4.1 Metadata correction note

Added a v0.1.1 correction note stating that the revision closes SELC-WDC-DELTA-REV-F1 by:

```
declaring §9 / §11 canonical for WDC annotations and severities;
adding a cross-document crosswalk;
adding a harmonization item for 03, patch index, and 08.
```

It also states that no WDC rule result, predicate, gate behavior, red line, pass state, or non-authority boundary changed.

4.2 Source basis

Added the initial review record to the source-basis table:

SELC_WDC_DELTA_REVIEW_RECORD_v0_1.md

4.3 Canonical vocabulary declaration

Added §9.0 Canonical vocabulary declaration, making SELF-EV0-04 the canonical source for:

WDC-LC rule semantics
WDC canonical checker results
WDC severity assignments
WDC annotation strings
WDC pass-state annotations

4.4 Cross-document crosswalk

Added §11.3 Cross-document WDC vocabulary crosswalk mapping older terms from the 03 delta and patch index to canonical 04 terms.

Key mappings include:

Older / planning term	Canonical term
`wdc.wrcg_required`	`wdc.wrcg_missing_or_failed`
`wdc.self_approval_of_witness_resources`	`wdc.sole_approver_of_witness_change`
`wdc.resource_floor_violation`	`wdc.witness_resource_floor_degraded`
`wdc.challenge_cost_increase`	`wdc.challenge_cost_mitigation_missing`
`wdc.witness_dependency_controls_present`	`wdc.clean_with_gates`
`wdc.challenge_capacity_degraded`	`wdc.witness_resource_floor_degraded` or `wdc.challenge_survivability_unverified`
`wdc.no_witness_dependency_regression`	`wdc.clean_no_dependency_impact` or `wdc.clean_with_gates`

4.5 Canonical severity assignments

Added §11.4 Canonical severity assignments.

Canonical assignments:

Rule / state	Result	Severity	Annotation
`WDC-LC-001`	FAIL	S3	`wdc.undeclared_dependency_impact`
`WDC-LC-002`	FAIL	S3	`wdc.wrcg_missing_or_failed`
`WDC-LC-003`	FAIL	S4	`wdc.sole_approver_of_witness_change`
`WDC-LC-004`	FAIL	S3	`wdc.witness_resource_floor_degraded`
`WDC-LC-005`	HUMAN_GATE	S2	`wdc.challenge_survivability_unverified`
`WDC-LC-006`	WARNING	S1	`wdc.challenge_cost_mitigation_missing`

4.6 Fixture / integration / review requirements

Updated fixture handoff, integration requirements, review requirements, and boundary checklist so future 08 fixtures and package assembly use canonical §11 vocabulary.

4.7 New open issue

Added:

SELC-WDC-0Q-005 – cross-document WDC vocabulary harmonization

This records the downstream obligation to harmonize:

03 WDC delta
patch index
future 08 fixture extension

against canonical 04 vocabulary.

5. Unchanged semantics

This revision does not change:

WDC-LC-001..006 canonical rule results
WDC predicates
WDC trigger keys
WRCG behavior
WRF / CST behavior
human-anchor review rule
sole-approver FAIL rule
PASS_WITH_GATES semantics
red-line interaction
checker non-authority boundary

6. Expected re-review target

The next expected artifact is:

SELC_WDC_DELTA_REVIEW_RECORD_v0_1_1.md

Expected verification target:

SELC-WDC-DELTA-REV-F1 -> CLOSED
No red line
No regression
04 WDC checker delta accepted at review level as PASS

7. Closing

The correction does not weaken the WDC checker. It makes the checker vocabulary explicit enough to govern downstream schema notes, patch-index references, and fixture expectations.

Patch intent: close cross-document vocabulary divergence without changing WDC rule behavior.
