SELF-EVO v0.1.2 Patch Index Patch Notes v0.1.1

Append-first correction notes for SELF_EVO_v0_1_2_PATCH_INDEX_v0_1_1.md

Status: patch notes / package-control companion artifact

Date: 2026-06-27

Patch notes ID: SELF_EVO_v0_1_2_PATCH_INDEX_PATCH_NOTES_v0_1_1

Corrected artifact: SELF_EVO_v0_1_2_PATCH_INDEX_v0_1_1.md

Corrected artifact SHA-256: ea2a485569b220d84d711ae520da779af2cabddcb7f1d8032afb2a9208d5108e

Corrected artifact line count: 811

Superseded artifact: SELF_EVO_v0_1_2_PATCH_INDEX.md

Superseded artifact SHA-256: 5892e95aa92ccf7c8d2d8f8d47cc2d0395ff7071660935c6b46a88df1d2645c8

Review driver: SELF_EVO_v0_1_2_PATCH_INDEX_REVIEW_RECORD_v0_1.md

Review driver SHA-256: 548f37575c5d51d6ed4abb1120551943afadd58bb41a43d6ad9df20188eee0a5

Review result before correction: PASS_WITH_LIMITS

Correction mode: append-first; prior draft and review record are retained.

> Boundary: these notes do not release v0.1.2, do not mutate the DOI-bound v0.1.1 package, do not authorize deployment, and do not convert review into authority.

1. Reason for patch

The v0.1 patch index was reviewed as PASS_WITH_LIMITS. The review found no red line and no safety regression, but identified three issues to close before a clean PASS convergence:

PATCH-REV-F1 – missing corpus bridge set + earth paragraph
 PATCH-REV-F2 – missing unaffected-artifact set and master-gate rationale
 PATCH-REV-F3 – schema-vs-sketch mismatch for challenge_cost_mitigation_ref

This v0.1.1 correction closes those findings without changing the intended WDC patch scope.

2. Changes made

2.1 Closure of PATCH-REV-F1

Added §2.2 Corpus bridge set for patching and versioning, including:

c = a + b bridge
 information-theory bridge
 cybernetics bridge
 physiology bridge
 earth paragraph

This aligns the patch index with the bridge discipline applied to accepted Self-Evo artifacts.

2.2 Closure of PATCH-REV-F2

Added §5.3 Explicit unaffected-artifact set, covering:

01 / C_Self_Evolution_Gate_CGAM_TRIAD_SRLM_Profile_v0_1_1.md
 02_SRLM_Bounded_Growth_Contour_Profile_v0_1_1.md
 06_Self_Evo_Memory_Gate_and_EA_Profile_v0_1_1.md

The section states that these artifacts require no direct v0.1.2 text delta because WDC outcomes propagate through the 03 schema and 04 Local Checker aggregation into the existing gate stack.

2.3 Closure of PATCH-REV-F3

Added the missing schema field:

```
challenge_cost_mitigation_ref: &quot;&quot; # required when increases_challenge_cost = true
```

This reconciles the §6 schema delta with the §16 implementation-handoff sketch.

2.4 Checklist update

Added closed review items to §17:

```
[x] Add corpus bridge set + earth paragraph to patch index.
[x] State unaffected artifacts 01/02/06 and master-gate inheritance rationale.
[x] Reconcile challenge_cost_mitigation_ref between schema and implementation sketch.
```

Added §17.1 Patch-index review findings closed in v0.1.1, mapping PATCH-REV-F1/F2/F3 to the exact closure sections.

3. Non-changes

This correction does not:

```
change the WDC control surface
change WDC-LC-001..006 semantics
change WDC-FIX-001..005 semantics
change SE-CONTRA-WDC-001
change SE-OI-WDC-001
release v0.1.2
modify the DOI-bound v0.1.1 package
perform package integration
claim conformance
claim deployment authorization
```

4. Expected re-review focus

A re-review should check only whether:

```
PATCH-REV-F1 is closed by §2.2
PATCH-REV-F2 is closed by §5.3
PATCH-REV-F3 is closed by §6
no new red line or regression was introduced
```

5. Closing

```
Patch notes verdict: correction prepared.
PATCH-REV-F1/F2/F3 addressed in the corrected patch index.
No integration performed.
No release performed.
Decision remains with c and a.
```
