Academic PDF rendering from Markdown source. Content-level claims are unchanged.

Boundary: this PDF rendering does not create a conformance certificate, deployment authorization, witness-independence certification, implementation claim, or live self-evolution permission.

SEOI-WDC-DELTA Patch Notes v0.1.1

Patch notes for 10_Self_Evo_Open_Issues_WDC_Delta_v0_1_2_v0_1_1

Status: Patch notes / control-layer artifact (advisory)

Date: 2026-06-27

Patch notes ID: SEOI_WDC_DELTA_PATCH_NOTES_v0_1_1

Patched artifact: 10_Self_Evo_Open_Issues_WDC_Delta_v0_1_2_v0_1_1.md

Patched artifact SHA-256: bd87725ddf72ddeac09db597900c465492d570dbaa68391e26b327aabb5790

Prior reviewed artifact: 10_Self_Evo_Open_Issues_WDC_Delta_v0_1_2.md

Prior reviewed artifact SHA-256: 463bd9f9770a5c19bfdbd7556590c47831a1bab4411bafelbbf368a1ac4be6e3

Review record addressed: SEOI_WDC_DELTA_REVIEW_RECORD_v0_1.md

Prior result: PASS_WITH_LIMITS

Patch result claimed: findings closed by text; requires re-review for PASS

> Boundary: these patch notes do not approve, integrate, release, certify, deploy, or authorize self-evolution. They describe an append-first correction to a draft open-issues delta.

1. Findings addressed

Finding	Review class	Status in this patch
`SEOI-WDC-DELTA-REV-F1`	must-fix / cross-document ID mismatch	`CLOSED BY TEXT`
`SEOI-WDC-DELTA-REV-F2`	minor / scrambled cross-reference	`CLOSED BY TEXT`

2. SEOI-WDC-DELTA-REV-F1 closure

The review found that accepted 03/04/05 WDC deltas already pointed WRF calibration deferrals at:

SE-OI-WDC-001

The prior open-issues delta used:

SE-OI-WDC-001 = WDC package assembly gate not executed
SE-OI-WDC-004 = Witness Resource Floor calibration policy

This patch uses the review's option (a): honor the already-published accepted delta references.

New mapping:

SE-OI-WDC-001 = Witness Resource Floor calibration policy
SE-OI-WDC-004 = WDC package assembly gate not executed

Updated locations:

\$7 summary
\$8 open-issue register
\$9.1 detailed record
\$9.4 detailed record
\$10 assembly-gate view
\$11 interaction with SELF-EVO-09
\$17.1 closure map

Package-assembly dependency now uses:

WDC-ASM-001 -> SE-OI-WDC-004 + SE-OI-WDC-013

Implementation-readiness dependency now uses:

WDC-ASM-006 -> SE-OI-WDC-001 + SE-OI-WDC-005 + SE-OI-WDC-006

3. SE0I-WDC-DELTA-REV-F2 closure

The review found that §11 had scrambled contradiction-to-document attributions for SE-CONTRA-WDC-004..007.

Corrected mapping:

```
| Contradiction | Correct closure attribution |
|---|---|
| `SE-CONTRA-WDC-004` | closed in `05` / TRIAD Sister Witness WDC delta |
| `SE-CONTRA-WDC-005` | closed in `08` / Fixture Pack WDC delta |
| `SE-CONTRA-WDC-006` | closed in `03` / Proposal Packet Schema WDC delta |
| `SE-CONTRA-WDC-007` | closed in the v0.1.2 Patch Index |
```

The contradiction register remains the contradiction source of truth; this file is only the work queue and assembly backlog.

4. Status-count preservation

The issue count remains:

Total WDC open-issue records: 16

Status counts remain numerically stable after the 001/004 ID swap:

```
IN_PROGRESS: 3
OPEN: 10
WATCH: 3
PATCHED: 0
RESOLVED: 0
DEFERRED: 0
```

Updated bucket membership:

```
IN_PROGRESS: SE-0I-WDC-002, SE-0I-WDC-003, SE-0I-WDC-004
OPEN: SE-0I-WDC-001, SE-0I-WDC-005, SE-0I-WDC-006, SE-0I-WDC-007, SE-0I-WDC-008, SE-0I-WDC-011,
      SE-0I-WDC-012, SE-0I-WDC-013, SE-0I-WDC-014, SE-0I-WDC-015
WATCH: SE-0I-WDC-009, SE-0I-WDC-010, SE-0I-WDC-016
```

5. Unchanged surfaces

This patch does not change:

```
issue substance
issue count
priority count
severity count
standing WDC assembly blockers
SELC-WDC-0Q-005 representation
SEARG-WDC-0Q-005 representation
S4 overclaiming guard
release / nonclaim language
package-manifest handoff
review requirements
public-release boundary
deployment boundary
self-evolution nonauthorization boundary
```

6. Expected re-review focus

A re-review should verify:

1. SE-0I-WDC-001 now resolves to WRF calibration.
2. SE-0I-WDC-004 now resolves to package assembly.
3. WDC-ASM-001 and WDC-ASM-006 dependencies use the corrected IDs.
4. §11 attributions for SE-CONTRA-WDC-004..007 are correct.
5. Status counts still total 16.

6. No release, conformance, deployment, witness-independence, or self-evolution authorization claim was introduced.

7. Closing

Patch notes verdict: findings addressed by text.
No integration performed.
No package release performed.
No conformance or deployment claim made.
Re-review required for convergence to PASS.
