Academic PDF rendering from Markdown source. Content-level claims are unchanged.

Boundary: this PDF rendering does not create a conformance certificate, deployment authorization, witness-independence certification, implementation claim, or live self-evolution permission.

SEPKT-WDC-DELTA Patch Notes v0.1.1

Patch notes for 03_Self_Evo_Proposal_Packet_Schema_WDC_Delta_v0_1_2_v0_1_1

Status: Patch notes / control-layer artifact (advisory)

Date: 2026-06-27

Patch notes ID: SEPKT_WDC_DELTA_PATCH_NOTES_v0_1_1

Short name: SEPKT-WDC-DELTA-PATCH-NOTES v0.1.1

Patched artifact: 03_Self_Evo_Proposal_Packet_Schema_WDC_Delta_v0_1_2_v0_1_1.md

Patched artifact SHA-256: 5ebbd0084f3b1b80ce267c847a84ef16f135b57e6fc353e4f07616dceebe4343

Superseded artifact: 03_Self_Evo_Proposal_Packet_Schema_WDC_Delta_v0_1_2.md

Superseded artifact SHA-256: f1bb8fd8eb35f6f2a8f35f585e1fa328a1e05dd9f77098ac44c44d3c4ef16620

Review driver: SEPKT_WDC_DELTA_REVIEW_RECORD_v0_1.md

Review driver result: PASS_WITH_LIMITS

Closed finding: SEPKT-WDC-DELTA-REV-F1

> Boundary: these patch notes document a correction to a draft delta artifact. They do not mutate the DOI-bound Self-Evo v0.1.1 package, do not release v0.1.2, do not approve integration, and do not authorize deployment or live self-evolution.

0. Patch summary

The review record SEPKT_WDC_DELTA_REVIEW_RECORD_v0_1.md found one minor issue:

```
SEPKT-WDC-DELTA-REV-F1:
  type: DOC / undeclared_cross_schema_dependency
  severity: S1
```

The delta referenced `#!/$defs/nullable_string` in five places, but did not explicitly state that `nullable_string` is inherited from the parent `03_Self_Evo_Proposal_Packet_Schema_v0_1_1.md` schema.

The reviewer verified that the parent schema does define `nullable_string`, so the schema resolves correctly when folded into the parent. The issue was only a standalone-extraction / traceability gap.

1. Changes made

1.1 Header correction note

The corrected artifact now declares itself as:

```
03_Self_Evo_Proposal_Packet_Schema_WDC_Delta_v0_1_2_v0_1_1
```

and records:

```
Review driver: SEPKT_WDC_DELTA_REVIEW_RECORD_v0_1.md
Correction note v0.1.1: closes SEPKT-WDC-DELTA-REV-F1
```

1.2 §6.3 nullable_string inheritance note

Added the following normative traceability note to §6.3 Supporting `$defs`:

```
nullable_string note: this delta reuses the existing parent definition #/$defs/nullable_string from
03_Self_Evo_Proposal_Packet_Schema_v0_1_1.md. It is intentionally not redefined here. Standalone
extraction of this delta MUST carry the parent nullable_string $def or replace these references with
an equivalent local definition.
```

1.3 §16 review-state note

Added a review-state note:

```
SEPKT_WDC_DELTA_REVIEW_RECORD_v0_1.md:
  result: PASS_WITH_LIMITS
  finding: SEPKT-WDC-DELTA-REV-F1
  status in this revision: CLOSED BY TEXT (§6.3 parent-inherited nullable_string note)
```

The artifact still requires re-review before being treated as PASS.

1.4 §18 drafting checklist note

Added a checklist item:

```
[ ] Carry parent #/$defs/nullable_string or define equivalent local ref during extraction.
```

1.5 Recommended next artifact

Updated the recommended next review artifact from:

```
03_SEPKT_WDC_DELTA_REVIEW_RECORD_v0_1.md
```

to:

```
SEPKT_WDC_DELTA_REVIEW_RECORD_v0_1_1.md
```

2. Non-changes

This patch does not change:

```
schema fields
required field set
semantic triggers
WDC trigger keys
fixture expectations
canonical checker results
red lines
stage model
gate ownership
WRCG behavior
human-anchor review rule
challenge-cost mitigation semantics
```

The corrected artifact remains a draft schema delta and does not become a released SELF-EV0-03 v0.1.2.

3. Closure map

```
| Review finding | Status | Closure |
|---|---:|---|
| `SEPKT-WDC-DELTA-REV-F1` | `CLOSED BY TEXT` | §6.3 now states that `nullable_string` is inherited from
  parent SELF-EV0-03 v0.1.1 and must be carried for standalone extraction. |
```

4. Re-review request

Recommended next artifact:

```
SEPKT_WDC_DELTA_REVIEW_RECORD_v0_1_1.md
```

Expected re-review scope:

```
Verify SEPKT-WDC-DELTA-REV-F1 closed.
Verify no schema-field regression.
Verify no result-vocabulary regression.
Verify no boundary/nonclaim regression.
```

5. Closing

Patch notes verdict: correction recorded.
One minor review finding closed by explicit parent-`$def` inheritance note.
No schema semantics changed.
No release performed.
Decision remains with c and a.
