Academic PDF rendering from Markdown source. Content-level claims are unchanged.

Boundary: this PDF rendering does not create a conformance certificate, deployment authorization, witness-independence certification, implementation claim, or live self-evolution permission.

TSW-WDC Delta Patch Notes v0.1.1

Patch notes for 05_Self_Evo_TRIAD_Sister_Witness_WDC_Delta_v0_1_2_v0_1_1

Status: Patch notes / control-layer artifact (advisory)

Date: 2026-06-27

Patch notes ID: TSW_WDC_DELTA_PATCH_NOTES_v0_1_1

Patch family: SELF-EVO v0.1.2 / WDC

Target artifact: 05_Self_Evo_TRIAD_Sister_Witness_WDC_Delta_v0_1_2.md

Corrected artifact: 05_Self_Evo_TRIAD_Sister_Witness_WDC_Delta_v0_1_2_v0_1_1.md

Trigger review record: TSW_WDC_DELTA_REVIEW_RECORD_v0_1.md

Trigger review result: PASS_WITH_LIMITS

2. Review finding addressed

TSW-WDC-DELTA-REV-F1 — **CLOSED BY TEXT**

The review found an internal route-vs-result mismatch:

§8.2 TSW-WDC-DEGRADED / TSW-WDC-STARVED routes were softer than the canonical WDC-LC-004 result.

The correction aligns the TRIAD WDC state model with the canonical Local Checker result:

WDC-LC-004 / wdc.witness_resource_floor_degraded -> FAIL

3. Textual changes

3.1 Metadata correction note

Added a v0.1.1 correction note stating that the revision closes TSW-WDC-DELTA-REV-F1 and does not change WDC definitions, fields, role constraints, SYNAPS boundaries, annotations, examples, red lines, or the non-authority boundary.

3.2 §8.2 state-route alignment

Changed the TSW-WDC-DEGRADED and TSW-WDC-STARVED default routes.

Before:

```
TSW-WDC-DEGRADED -&gt; human gate / hold  
TSW-WDC-STARVED -&gt; FAIL or HOLD; no integration
```

After:

```
TSW-WDC-DEGRADED -&gt; WDC-LC-004 -&gt; FAIL on any material floor-degraded route; no integration  
TSW-WDC-STARVED -&gt; WDC-LC-004 -&gt; FAIL; no integration
```

3.3 §8.2 state-route precedence note

Added a note that the §8.2 table is subordinate to the canonical Local Checker result:

If WDC-LC-004 / wdc.witness_resource_floor_degraded fires on a material route,
the canonical result is FAIL per §13.3 and §14.3.

HOLD or HUMAN_GATE may describe unresolved evidence or non-material pre-check triage, but they may not soften a confirmed WDC-LC-004 finding.

3.4 §10.1 canonical result declaration

Added:

canonical_result: FAIL

and an explicit route-precedence note:

If WDC-LC-004 fires, the canonical FAIL controls.
A sister witness may record context or request human review,
but it may not downgrade this finding to HOLD or HUMAN_GATE.

3.5 §22.1 closure map

Added a review-finding closure map:

TSW-WDC-DELTA-REV-F1 – CLOSED BY TEXT

4. No-change statement

This patch does not change:

WDC definitions
WRF / CST / WRCG field set
TRIAD WDC trigger set
canonical SELF-EV0-04 vocabulary
canonical annotations
SYNAPS exchange boundary
role-specific TRIAD constraints
Rita / Liya / Ester boundaries
anti-echo logic
divergence preservation
example semantics
red-line set
implementation sketch route logic
checker non-authority boundary

5. Expected next review

Recommended next artifact:

TSW_WDC_DELTA_REVIEW_RECORD_v0_1_1.md

Expected review target:

Verify that TSW-WDC-DELTA-REV-F1 is closed and no route-vs-result regression remains.

Expected convergence target:

PASS

6. Boundary

These patch notes are evidence of an append-first correction. They do not integrate the delta, do not release a v0.1.2 package, do not approve self-evolution, and do not authorize deployment or live

memory/resource changes.
