

SEARG-WDC-DELTA Review Record v0.1.1 (re-review / convergence)

Kotov Ivan, Bruxelles, Belgique 2026

Self-Evo WDC v0.1.2

Source file:

controls/review_records/SEARG_WDC_DELTA_REVIEW_RECORD_v0_1_1.md

Academic PDF rendering from Markdown source. Content-level claims are unchanged.

Boundary: this PDF rendering does not create a conformance certificate, deployment authorization, witness-independence certification, implementation claim, or live self-evolution permission.

SEARG-WDC-DELTA Review Record v0.1.1 (re-review / convergence)

Independent semantic re-review record for

07_Self_Evo_Anti_Autarky_and_Resource_Gate_WDC_Delta_v0_1_2_v0_1_1

Status: Review record / control-layer artifact (advisory) — append-first supersession of SEARG_WDC_DELTA_REVIEW_RECORD_v0_1

Date: 2026-06-27T08:51:51Z

Record ID: SEARG_WDC_DELTA_REVIEW_RECORD_v0_1_1

Short name: SEARG-WDC-DELTA-REVIEW v0.1.1

Reviewer role: semantic reviewer / checker (CGAM b-layer worker; not c, not a)

Reviewer authority: advisory only (QR-AX-02); this record is evidence, not approval, not integration, not memory write

Result: PASS

Reviewed artifact: 07_Self_Evo_Anti_Autarky_and_Resource_Gate_WDC_Delta_v0_1_2_v0_1_1.md

Reviewed artifact SHA-256: 804a8e341e30a2a86fa43429618f24e62458366e236c7b6ef8c12762d94da7af

Supersedes: SEARG_WDC_DELTA_REVIEW_RECORD_v0_1 (result PASS_WITH_LIMITS, reviewed sha256 8ef02b23b498efed9618684af355f72c3c853cdf433ae80b970b1e7c7b405b82)

Patch notes considered (context only): SEARG_WDC_DELTA_PATCH_NOTES_v0_1_1.md — claims verified against the actual artifact text, not relied on as evidence.

> Status caveat (inherited from pack): private reference review record. Not a public release. Not a conformance certificate. Not deployment authorization. The prior record is not deleted; this record references it (append-first).

0. Reviewer boundary statement

Produced by a bounded CGAM review worker acting as a semantic reviewer / checker. It did not author the reviewed artifact (QR-AX-01); it does not approve, integrate, or write memory (AX-03, AX-04, QR-AX-02); the verdict is advisory and final disposition belongs to the c gate and human anchor a. This is a re-review of the v0.1.1 corrected delta against the finding of SEARG_WDC_DELTA_REVIEW_RECORD_v0_1. The accompanying patch notes were read for context; all closure claims were verified against the actual artifact text.

  verified_by: >
    Verified against the actual artifact text. §9.1 now defines &#x27;consistent&#x27; as
    projection-consistent through
    the §11.2 and §13.2 crosswalks (not identical enum spelling), affirms the 03 packet enums
    ({pass, fail, human_gate, not_run} and {pass, fail, not_run, not_applicable}) as the
    packet-facing
    representation, and requires richer 07 values to project before package assembly / checker
    reporting /
    manifest integration. §11.2 projects every WRCG gate-record value to a valid 03 enum value while
    preserving
    the richer semantics in the WDC annotation + canonical checker route (pass_with_gates -> pass +
    wdc.clean_with_gates / PASS_WITH_GATES; warning -> pass + wdc.challenge_cost_mitigation_missing;
    hold ->
    not_run + wdc.relevance_unknown), and adds a fail-closed rule (unprojectable_wrcg_result -> FAIL
    /
    wdc.wrcg_missing_or_failed). §13.2 projects every CST value to a valid 03 enum value
    (verified -> pass; unverified -> not_run + wdc.challenge_survivability_unverified; failed ->
    fail;
    unknown -> not_run + wdc.relevance_unknown), and forbids treating a material not_run projection
    as a clean
    pass. The §28.1 closure map records the finding closed.
  design_assessment: "sound – projection is total over the 07 values, lossless via annotation+route,
    fail-closed, and cannot launder a material unverified CST into a pass";

2. Verification summary

The finding from SEARG_WDC_DELTA_REVIEW_RECORD_v0_1 was checked against the v0.1.1 text (the patch notes were read for context only).

- SEARG-WDC-DELTA-REV-F1 (must-fix, cross-document) — closed. §9.1 redefines "consistent" as projection-consistent through the §11.2/§13.2 crosswalks (not identical enum spelling) and affirms the 03 packet enums as the packet-facing representation. §11.2 and §13.2 project every richer 07 WRCG/CST value to a valid 03 enum value while preserving the richer semantics in the WDC annotation and canonical checker route; an unprojectable WRCG result is fail-closed to FAIL / wdc.wrcg_missing_or_failed; and a material not_run CST projection cannot be treated as a clean pass. The design is sound (total, lossless, fail-closed). The §28.1 closure map records the finding closed.

Regression: the section numbering is intact (§0..§29), the annotation vocabulary is unchanged (§14 maps_to WDC-LC-*, §15 canonical table), the change is additive only (corroborated by the intact §14/§15/§17/§18), and PASS_WITH_LIMITS appears only in prohibition statements. No residuals were found.

3. Verdict rationale

The v0.1.1 revision closes the finding with a correct, additive projection design that keeps the 03 packet schema authoritative while letting the 07 resource-gate sidecar carry richer diagnostics that must project before assembly; the projection is total, lossless (richer meaning carried in annotation + checker route), and fail-closed. No regressions were introduced and no red line is present. The result therefore moves from PASS_WITH_LIMITS to PASS.

The resource-gate delta is accepted at review level. One tracked downstream item remains: SEARG-WDC-0Q-005 requires the WRCG/CST projection crosswalk to be verified at package assembly, alongside the annotation-harmonization item SELC-WDC-0Q-005. The remaining v0.1.2 path continues with the SELF-EVO-09/10 entries, then the package-manifest review.

4. Closing

Re-review verdict: PASS (up from PASS_WITH_LIMITS).

SEARG-WDC-DELTA-REV-F1 closed: §9.1 projection-consistent; §11.2/§13.2 total, lossless, fail-closed crosswalks to the 03 packet enums.

Verified against the actual artifact text (patch notes context only). No regressions. No residuals.

Tracked downstream: SEARG-WDC-0Q-005 (verify the WRCG/CST projection at package assembly).

No red line. No integration performed. Decision remains with c and a.
