SECR-WDC-DELTA Review Record v0.1.1 (re-review / convergence)

Independent semantic re-review record for

09_Self_Evo_Contradiction_Register_WDC_Delta_v0_1_2_v0_1_1

Status: Review record / control-layer artifact (advisory) — append-first supersession of SECR_WDC_DELTA_REVIEW_RECORD_v0_1

Date: 2026-06-27T09:36:38Z

Record ID: SECR_WDC_DELTA_REVIEW_RECORD_v0_1_1

Short name: SECR-WDC-DELTA-REVIEW v0.1.1

Reviewer role: semantic reviewer / checker (CGAM b-layer worker; not c, not a)

Reviewer authority: advisory only (QR-AX-02); this record is evidence, not approval, not integration, not memory write

Result: PASS

Reviewed artifact: 09_Self_Evo_Contradiction_Register_WDC_Delta_v0_1_2_v0_1_1.md

Reviewed artifact SHA-256: 35b892a4fcfce6f241d3f25978ea58a624ae8077487bb69d6cf21063221c2bc4

Supersedes: SECR_WDC_DELTA_REVIEW_RECORD_v0_1 (result PASS_WITH_LIMITS, reviewed sha256 bb77f15cb7be69e15c0885d1f6ad95495b5405a2bbb06a2620cfabd3296acb56)

> Status caveat (inherited from pack): private reference review record. Not a public release. Not a conformance certificate. Not deployment authorization. The prior record is not deleted; this record references it (append-first).

0. Reviewer boundary statement

Produced by a bounded CGAM review worker acting as a semantic reviewer / checker. It did not author the reviewed artifact (QR-AX-01); it does not approve, integrate, or write memory (AX-03, AX-04, QR-AX-02); the verdict is advisory and final disposition belongs to the c gate and human anchor a. This is a re-review of the v0.1.1 corrected delta against the finding of SECR_WDC_DELTA_REVIEW_RECORD_v0_1.

2. Verification summary

The finding from SECR_WDC_DELTA_REVIEW_RECORD_v0_1 was checked against the v0.1.1 text.

- SECR-WDC-DELTA-REV-F1 (minor) — closed. §7.1 now uses a unified status vocabulary {RESOLVED, PATCHED, IN_PROGRESS, WATCH}, separates gate effects from status, lists per-bucket entries, and totals exactly 12 (RESOLVED 4 + PATCHED 2 + IN_PROGRESS 3 + WATCH 3 + OPEN-hard 0). §7.2 adds a separate Gate-effect column, and every entry's Status matches its §7.1 bucket (verified row by row). The §17.1 closure map records the finding closed.

Regression: the section numbering is intact (§0..§18), the twelve contradiction entries and their attributions are unchanged, the OQ references and package-assembly gates are intact, and the change is additive only (per the correction note). No residuals were found.

3. Verdict rationale

The v0.1.1 revision closes the finding with a correct, additive reconciliation: the status summary and the register entries now share one vocabulary, each of the twelve entries maps to exactly one bucket, the counts total 12, and gate effects are tracked in a separate column. No regressions were introduced and no red line is present; the register still carries the S4 overclaiming guard and makes no readiness overclaim. The result therefore moves from PASS_WITH_LIMITS to PASS.

The contradiction-register delta is accepted at review level. The remaining v0.1.2 path continues with the SELF-EVO-10 open-issues delta (the final affected document), then the package-manifest review — which will execute WDC-ASM-002 (the SELC-WDC-0Q-005 annotation harmonization of 03 and the patch index) and WDC-ASM-003 (the SEARG-WDC-0Q-005 verification of the 07 WRCG/CST projection).

4. Closing

Re-review verdict: PASS (up from PASS_WITH_LIMITS).

SECR-WDC-DELTA-REV-F1 closed: §7.1 unified status vocabulary, counts total 12, gate effects separated;

§7.1<->§7.2 consistent.

No regressions. No residuals. Substance, severities, gates, and the S4 overclaiming guard unchanged.

Contradiction register 09 converged.

No red line. No integration performed. Decision remains with c and a.
