0. Reviewer boundary statement

Produced by a bounded CGAM review worker acting as a semantic reviewer / checker. It did not author the reviewed artifact (QR-AX-01); it does not approve, integrate, or write memory (AX-03, AX-04, QR-AX-02); the verdict is advisory and final disposition belongs to the c gate and human anchor a. This is a re-review of the v0.1.2 corrected delta against the finding of SEFX_WDC_DELTA_REVIEW_RECORD_v0_1_1.

2. Verification summary

The finding from SEFX_WDC_DELTA_REVIEW_RECORD_v0_1_1 was checked against the v0.1.2 text.

- SEFX-WDC-DELTA-REV-F2 (minor regression) — closed. §18.1 is now ### 18.1 (level-3 subsection), corrected from ## 18.1. The v0.1.2 correction note documents the change as strictly heading-level,

and the closure map records it as CLOSED BY TEXT. SEFX-WDC-DELTA-REV-F1 and SEFX-WDC-DELTA-REV-N1 remain closed.

Regression: the top-level numbering is intact (§0..§20, no duplicate), the change is additive only (per the correction note, consistent with the unchanged fixtures, namespace rule, canonical vocabulary, and §12.3 gate), and PASS_WITH_LIMITS appears only in prohibition statements. No residuals were found.

3. Verdict rationale

The v0.1.2 revision closes the heading-level regression with a correct, strictly-editorial fix and introduces no new regressions; the prior findings remain closed. No red line is present. The result therefore moves from PASS_WITH_LIMITS to PASS.

The fixture delta is accepted at review level. It is harmonized to the canonical 04 vocabulary and retains the §12.3 package-assembly gate. The SELC-WDC-0Q-005 harmonization remains satisfied for the fixture pack; the 03 delta (likely a v0.1.2 bump) and the patch index §7.1/§10 are still to be harmonized, to be verified at the package-manifest review. The remaining v0.1.2 path continues with the SELF-EVO-05/07 deltas and the SELF-EVO-09/10 entries.

4. Closing

Re-review verdict: PASS (up from PASS_WITH_LIMITS).

SEFX-WDC-DELTA-REV-F2 closed (§18.1 now '### 18.1'); F1 and N1 remain closed. No regressions. No residuals.

Fixture delta 08 converged across three passes. Harmonized; §12.3 gate intact; SELC-WDC-0Q-005 satisfied for the fixture pack.

Tracked downstream: harmonize 03 + patch index to the canonical 04 vocabulary before package assembly. No red line. No integration performed. Decision remains with c and a.
