Boundary: this PDF rendering does not create a conformance certificate, deployment authorization, witness-independence certification, implementation claim, or live self-evolution permission.

SELF-EVO Addendum 01 (WDC) Review Record v0.1.1 (re-review / convergence)

Independent semantic re-review record for

SELF_EVO_ADDENDUM_01_Witness_Dependency_Capture_Profile_v0_1_1

Status: Review record / control-layer artifact (advisory) — append-first supersession of SELF_EVO_ADDENDUM_01_WDC_REVIEW_RECORD_v0_1

Date: 2026-06-27T05:15:35Z

Record ID: SELF_EVO_ADDENDUM_01_WDC_REVIEW_RECORD_v0_1_1

Short name: WDC-REVIEW v0.1.1

Reviewer role: semantic reviewer / checker (CGAM b-layer worker; not c, not a)

Reviewer authority: advisory only (QR-AX-02); this record is evidence, not approval, not integration, not memory write

Result: PASS

Reviewed artifact: SELF_EVO_ADDENDUM_01_Witness_Dependency_Capture_Profile_v0_1_1.md

Reviewed artifact SHA-256: 1307cf208593c40c688bd1e9beb45de35f29a1b05d71506b1c3e981ccc13d318

Supersedes: SELF_EVO_ADDENDUM_01_WDC_REVIEW_RECORD_v0_1 (result PASS_WITH_LIMITS, reviewed sha256 386b14272a85575a259d85fe4a92b551a5226bf5d2c4b42d48868de71c1fe241)

> Status caveat (inherited from pack): private reference review record. Not a public release. Not a conformance certificate. Not deployment authorization. The prior record is not deleted; this record references it (append-first).

0. Reviewer boundary statement

Produced by a bounded CGAM review worker acting as a semantic reviewer / checker. It did not author the reviewed artifact (QR-AX-01); it does not approve, integrate, or write memory (AX-03, AX-04, QR-AX-02); the verdict is advisory and final disposition belongs to the c gate and human anchor a. This is a re-review of the v0.1.1 revision against the findings of SELF_EVO_ADDENDUM_01_WDC_REVIEW_RECORD_v0_1.

    §8.1 is now a rule table with columns Rule | Trigger | Canonical result | Severity | Typical
    annotation.
    All six WDC-LC rules map to a single canonical result from the enum (WDC-LC-001..004 FAIL, -005
    HUMAN_GATE,
    -006 WARNING) plus a wdc.* annotation, with severity as a separate axis. WDC-LC-006 &#x27;warn or
    fail&#x27; is
    resolved to a single WARNING. §8.2 adds the non-failing PASS_WITH_GATES structural outcome. The
    enum is
    stated explicitly. §15 sketch returns pass_with_gates(...).
- id: &quot;WDC-REV-F2&quot;
  prior_class: &quot;must_fix&quot;
  status: &quot;CLOSED&quot;
  verified_by: &gt;
    §9 fixtures and the §16 worked example use canonical_result + annotations; WDC-FIX-003/005 are
    now
    PASS_WITH_GATES. No PASS_WITH_LIMITS or compound result tokens remain (grep clean). Annotations
    use the
    wdc.* namespace.

  self_certification_path: false
  overclaim_present: false
  result: &quot;no red line; net-positive for safety&quot;

conformance_position:
  role: &quot;append-only addendum recording a failure mode and proposed control surface&quot;
  state: &quot;review-clean at draft level; ready to fold into a v0.1.2 patch plan&quot;

recommended_next_state:
  reviewed_document: &quot;v0.1.1 accepted at review level as PASS&quot;
  action: &gt;
    Concept and control surface (WDC failure modes, WRF, CST, WRCG) are review-clean. Fold into
    SELF-EVO_v0_1_2_PATCH_INDEX: package schema delta (witness_dependency_impact), local checker rule
    delta
    (WDC-LC-001..006), SELF-EVO-08 fixture extension (WDC-FIX-001..005), and the SELF-EVO-09/10
    candidates.
  decision_owner: &quot;c-gate + human anchor (a)&quot; # advisory only

witness_note: &gt;
  Control-layer re-review artifact bound to reviewed_artifact.sha256, append-first over the v0.1
  record.
  Evidence of a performed re-review, not an approval or integration event.

```

```
rollback_note: &gt;
  Supersede by a further append-first record if a later revision changes the verdict. Do not delete
  prior records;
  preserve the witness chain (v0.1 record -&gt; this record).

record_sha256: &quot;&lt;seal at integration time&gt;&quot;
```

2. Verification summary

All findings (and the nit) from SELF_EVO_ADDENDUM_01_WDC_REVIEW_RECORD_v0_1 were checked against the v0.1.1 text, not against the revision log.

- WDC-REV-F1 (must-fix) — closed. §8.1 maps every WDC-LC-* rule to a single canonical result from the pack enum plus a wdc.* annotation, with severity as a separate axis; WDC-LC-006 is resolved to a single WARNING; §8.2 adds the PASS_WITH_GATES structural outcome; the §15 sketch returns `pass_with_gates(...)`.
- WDC-REV-F2 (must-fix) — closed. §9 fixtures and the §16 worked example use `canonical_result + annotations`; WDC-FIX-003/005 are now PASS_WITH_GATES; no PASS_WITH_LIMITS or compound result tokens remain.
- WDC-REV-F3 (should-fix) — closed. A source-basis table hash-binds all five parent profiles and the package (with the Zenodo DOI and archival ZIP hash), explicitly without mutating them.
- WDC-REV-N1 (nit) — closed. An information-theory bridge was added (three quiet bridges plus earth), and SE-CONTRA-WDC-001's status is now the harmonized OPEN, with ADDENDUM-RECORDED demoted to a labeled source note.

Regression: the numbered header sequence is intact (0..19; the source-basis is front-matter and §3 gained subsection 3.2 without shifting top-level numbering), all results are valid pack enum values, provenance is hash-bound, and no broken references were introduced. No residuals were found.

3. Verdict rationale

The v0.1.1 revision closes all three findings and the nit with correct, internally consistent implementations and introduces no regressions; the fixes also added an information-theory bridge and the real package DOI/hash, exceeding the minimum. No red line is present, and the addendum remains net-positive for safety. The result therefore moves from PASS_WITH_LIMITS to PASS.

The concept and its control surface (Witness Dependency Capture failure modes, Witness Resource Floor, Challenge Survivability Test, Witness Resource Change Gate) are review-clean at draft level and ready to fold into a SELF_EVO_v0_1_2_PATCH_INDEX: a package schema delta (`witness_dependency_impact`), a local checker rule delta (WDC-LC-001..006), a SELF-EVO-08 fixture extension (WDC-FIX-001..005), and the SELF-EVO-09/10 candidates.

4. Closing

```
Re-review verdict: PASS (up from PASS_WITH_LIMITS).
F1, F2, F3, N1 verified closed. No regressions. No residuals.
Concept review-clean and ready for a v0.1.2 patch plan.
No red line. Net-positive for safety. No integration performed. Decision remains with c and a.
```
