Self-Evo WDC v0.1.2 Package Assembly Review Record v0.1.4 (re-review / convergence)

Independent control-layer re-review record for

SELF_EVO_WDC_v0_1_2_PACKAGE_ASSEMBLY_MANIFEST_v0_1_4

Status: Review record / control-layer artifact (advisory) — append-first supersession of SELF_EVO_WDC_v0_1_2_PACKAGE_ASSEMBLY_REVIEW_RECORD_v0_1_3

Date: 2026-06-27T18:59:41Z

Record ID: SELF_EVO_WDC_v0_1_2_PACKAGE_ASSEMBLY_REVIEW_RECORD_v0_1_4

Short name: SEPAM-REVIEW v0.1.4

Reviewer role: semantic / package-control reviewer (CGAM b-layer worker; not c, not a)

Reviewer authority: advisory only (QR-AX-02); this record is evidence, not approval, not assembly, not release

Result: PASS

Reviewed artifact: SELF_EVO_WDC_v0_1_2_PACKAGE_ASSEMBLY_MANIFEST_v0_1_4.md

Reviewed artifact SHA-256: ad9adcddff485f28f78f4d741add275232a0d86413d45c14277a2bb5286c4301

Supersedes: SELF_EVO_WDC_v0_1_2_PACKAGE_ASSEMBLY_REVIEW_RECORD_v0_1_3 (result PASS, reviewed manifest sha256 aa5fb978000d96df74c03dc735bcbd1c8170b9d34644e85b8297fd114759f917)

> Scope reminder: this records convergence of the manifest as an artifact. The package is not assembled; WDC-ASM-001 (full assembly), WDC-ASM-004 (fixtures), and WDC-ASM-005 (boundary scan) remain open. It does not assemble or release the package.

> Status caveat (inherited from pack): private reference review record. The prior record is retained (append-first).

0. Reviewer boundary statement

Produced by a bounded CGAM review worker acting as a semantic / package-control reviewer. It did not author the reviewed artifact (QR-AX-01); it does not approve, integrate, assemble, or release (AX-03, AX-04, QR-AX-02); the verdict is advisory and final disposition belongs to the c gate and human anchor a. The SHA map and gate states were verified against the reviewer's accepted hashes and the WDC-ASM-003 closure record.

```

2. Verification summary

The v0.1.4 manifest propagates the WDC-ASM-003 closure into the gate state, and the propagation is verified correct.

- Gate and flag. WDC-ASM-003 is recorded CLOSED on the basis of the c/a closure record (1a91abea) and the documentary review PASS; the machine flag projection_verified is now true; and SEARG-WDC-0Q-005 is marked satisfied. WDC-ASM-002 remains CLOSED with annotation_harmonization_verified true.
- SHA map unchanged. The projection gate changes no files, so 03=5a7e6af6, index=af01b1b4, addendum=1307cf20, and the other artifacts are unchanged; the 07 entry is annotated WDC-ASM-003 CLOSED under the same hash. No stale hashes appear.
- Predecessor binding extended. The header binds the full predecessor chain by hash — v0.1.3 (aa5fb978), v0.1.2 (a3b919bb), and v0.1.1 (cde9178a) — carrying the SEPAM-V012-REV-F1 fix forward and broadening it.
- Doctrine. The other gates remain pending and unclaimed, package_assembled is false, the bridge set and nonclaim discipline are intact, and the earth paragraph is honestly updated for the closure.

There are no findings.

3. Verdict rationale

There is no red line. The manifest correctly propagates the second gate closure: it records WDC-ASM-003 as closed on c/a authority, flips projection_verified to true, marks SEARG-WDC-0Q-005 satisfied, leaves the SHA map and the WDC-ASM-002 state untouched (correctly, since a projection gate changes no files), keeps the remaining gates open and unclaimed, and extends the hash-bound predecessor chain. No regression was introduced. The result is PASS.

The manifest is accepted at review level as an artifact. The boundary stated in the prior records holds: this is not package assembly or release. Two of the five substantive gates are now closed (WDC-ASM-002, WDC-ASM-003); WDC-ASM-004 (08 fixture gate), WDC-ASM-005 (boundary/nonclaim scan), and WDC-ASM-001 (final assembly) remain. The next work is WDC-ASM-004. All decisions remain with c and a.

4. Closing

Re-review verdict: PASS.

WDC-ASM-003 propagated: CLOSED + projection_verified true, grounded in the c/a closure record and the documentary review PASS; SEARG-WDC-0Q-005 satisfied.

Regression clean: SHA map unchanged (no stale hashes), WDC-ASM-002 still closed, flags correct, bridge set + nonclaim intact.

Predecessor chain hash-bound and extended (v0.1.3 + v0.1.2 + v0.1.1).

Manifest converged as an artifact; package not assembled; two of five substantive gates closed; WDC-ASM-001/004/005 remain.

Next: WDC-ASM-004 (08 fixture gate).

No red line. No assembly or release performed. Decision remains with c and a.
