Boundary: this PDF rendering does not create a conformance certificate, deployment authorization, witness-independence certification, implementation claim, or live self-evolution permission.

SELF-EVO v0.1.2 Patch Index Review Record v0.1.1 (re-review / convergence)

Independent semantic re-review record for SELF_EVO_v0_1_2_PATCH_INDEX_v0_1_1

Status: Review record / control-layer artifact (advisory) — append-first supersession of SELF_EVO_v0_1_2_PATCH_INDEX_REVIEW_RECORD_v0_1; clears the held re-review in SELF_EVO_v0_1_2_PATCH_INDEX_PATCH_NOTES_REVIEW_RECORD_v0_1

Date: 2026-06-27T05:43:53Z

Record ID: SELF_EVO_v0_1_2_PATCH_INDEX_REVIEW_RECORD_v0_1_1

Short name: PATCH-INDEX-REVIEW v0.1.1

Reviewer role: semantic reviewer / checker (CGAM b-layer worker; not c, not a)

Reviewer authority: advisory only (QR-AX-02); this record is evidence, not approval, not integration, not memory write

Result: PASS

Reviewed artifact: SELF_EVO_v0_1_2_PATCH_INDEX_v0_1_1.md

Reviewed artifact SHA-256: ea2a485569b220d84d711ae520da779af2cabddcb7f1d8032afb2a9208d5108e

Supersedes: SELF_EVO_v0_1_2_PATCH_INDEX_REVIEW_RECORD_v0_1 (result PASS_WITH_LIMITS, reviewed sha256 5892e95aa92ccf7c8d2d8f8d47cc2d0395ff7071660935c6b46a88df1d2645c8)

> Status caveat (inherited from pack): private reference review record. Not a public release. Not a conformance certificate. Not deployment authorization. The prior records are not deleted; this record references them (append-first).

0. Reviewer boundary statement

Produced by a bounded CGAM review worker acting as a semantic reviewer / checker. It did not author the reviewed artifact (QR-AX-01); it does not approve, integrate, or write memory (AX-03, AX-04, QR-AX-02); the verdict is advisory and final disposition belongs to the c gate and human anchor a. This is the re-review held in SELF_EVO_v0_1_2_PATCH_INDEX_PATCH_NOTES_REVIEW_RECORD_v0_1, now completed against the corrected text.

```

2. Verification summary

All three findings from SELF_EVO_v0_1_2_PATCH_INDEX_REVIEW_RECORD_v0_1 were checked against the corrected text (ea2a4855..., 811 lines), whose hash matches the patch-notes citation.

- PATCH-REV-F1 (should-fix) — closed. §2.2 adds an explicit $c = a + b$ bridge plus three quiet bridges from distinct corpora (information theory, cybernetics, physiology) and an earth paragraph, all tailored to patching and to the WDC control surface.
- PATCH-REV-F2 (minor) — closed. §5.3 names 01/02/06 as intentionally unaffected with per-artifact rationale, including the master-gate inheritance argument (it consumes WDC checker results rather than needing a new classification axis) and an explicit fallback condition.
- PATCH-REV-F3 (minor) — closed. §6 adds challenge_cost_mitigation_ref, matching the §16 sketch.

Regression: top-level numbering is intact (the new material is subsections §2.2/§5.3/§17.1), the WDC control surface is unchanged (WDC-LC-001..006, WDC-FIX-001..005, SE-CONTRA-WDC-001, SE-OI-WDC-001), no PASS_WITH_LIMITS is used as a checker/fixture output, provenance bindings are intact, and §17.1 honestly maps the closures while noting the index still required this re-review. No residuals were found.

3. Verdict rationale

The v0.1.1 revision closes all three findings against the corrected text with correct, internally consistent implementations and introduces no regressions; the F1 and F2 fixes are notably thorough (a fully tailored bridge set and an explicit master-gate inheritance rationale with a fallback condition). No red line is present, and the boundary and anti-overclaiming discipline is preserved. The result therefore moves from PASS_WITH_LIMITS to PASS, and the re-review held in the patch-notes record is cleared.

The patch index is accepted at review level as a planning artifact and may drive drafting of the changed v0.1.2 documents. A public v0.1.2 release still requires the remaining §15 review gates (affected-document reviews, Local Checker and fixture vocabulary reviews, package-manifest integrity review, boundary/nonclaim scan).

4. Closing

Re-review verdict: PASS (up from PASS_WITH_LIMITS); held re-review cleared.
 F1, F2, F3 verified closed against the corrected text. No regressions. No residuals.
 v0.1.2 remains unreleased pending the remaining §15 review gates.
 No red line. No integration performed. Decision remains with c and a.
