Academic PDF rendering from Markdown source. Content-level claims are unchanged.

Boundary: this PDF rendering does not create a conformance certificate, deployment authorization, witness-independence certification, implementation claim, or live self-evolution permission.

SEOI-WDC-DELTA Review Record v0.1.1 (re-review / convergence)

Independent semantic re-review record for

10_Self_Evo_Open_Issues_WDC_Delta_v0_1_2_v0_1_1

Status: Review record / control-layer artifact (advisory) — append-first supersession of SEOI_WDC_DELTA_REVIEW_RECORD_v0_1

Date: 2026-06-27T10:10:32Z

Record ID: SEOI_WDC_DELTA_REVIEW_RECORD_v0_1_1

Short name: SEOI-WDC-DELTA-REVIEW v0.1.1

Reviewer role: semantic reviewer / checker (CGAM b-layer worker; not c, not a)

Reviewer authority: advisory only (QR-AX-02); this record is evidence, not approval, not integration, not memory write

Result: PASS

Reviewed artifact: 10_Self_Evo_Open_Issues_WDC_Delta_v0_1_2_v0_1_1.md

Reviewed artifact SHA-256: bd87725ddf72ddeac09db597900c465492d570dbaaaf68391e26b327aabb5790

Supersedes: SEOI_WDC_DELTA_REVIEW_RECORD_v0_1 (result PASS_WITH_LIMITS, reviewed sha256 463bd9f9770a5c19bfbdb7556590c47831a1bab4411bafef1bbf368a1ac4be6e3)

> Milestone: this is the final affected document of the v0.1.2 WDC delta set. With its convergence to PASS, all seven affected documents (03/04/05/07/08/09/10) are at PASS, and the next phase is the package-manifest review.

> Status caveat (inherited from pack): private reference review record. Not a public release. Not a conformance certificate. Not deployment authorization. The prior record is not deleted; this record references it (append-first).

0. Reviewer boundary statement

Produced by a bounded CGAM review worker acting as a semantic reviewer / checker. It did not author the reviewed artifact (QR-AX-01); it does not approve, integrate, or write memory (AX-03, AX-04, QR-AX-02); the verdict is advisory and final disposition belongs to the c gate and human anchor a. This is a re-review of the v0.1.1 corrected delta against the findings of SEOI_WDC_DELTA_REVIEW_RECORD_v0_1.

1. Machine-readable re-review record

  prior_class: &quot;must_fix (cross-document)&quot;;
  status: &quot;CLOSED&quot;;
  verified_by: &gt;;
    Closed by renumbering (option a): SE-0I-WDC-001 is now &#x27;Witness Resource Floor calibration
    policy&#x27;;
    (P1/S3/OPEN), matching the accepted 03/04/05 WRF references, and the package-assembly issue
    moved to
    SE-0I-WDC-004 (P0/S4/IN_PROGRESS). The swap was applied consistently: §7 summary (IN_PROGRESS
    includes 004,
    OPEN includes 001), §9.1/§9.4, §10 assembly-gate view (WDC-ASM-001 -&gt; 004/013; WDC-ASM-006 -&gt;
    001/005/006),
    and §11 (SE-CONTRA-WDC-001/010 -&gt; 004/013). Each issue retained its own priority/severity. No
    dangling
    reference to the old numbering was found. The §17.1 closure map records the finding closed.
- id: &quot;SE0I-WDC-DELTA-REV-F2&quot;;
  prior_class: &quot;minor&quot;;
  status: &quot;CLOSED&quot;;
  verified_by: &gt;;
    §11 attributions corrected: SE-CONTRA-WDC-004 -&gt; 05 (TRIAD), 005 -&gt; 08 (Fixture pack), 006 -&gt;
03
    (Schema
    delta), 007 -&gt; patch index, with notes now matching the contradiction subjects. The §17.1
    closure map
    records the finding closed.

regression_check:
  section_numbering: &quot;intact – §0..§18, no gaps/dupes&quot;;
  status_counts: &quot;§7 totals 16 (IN_PROGRESS 3 + OPEN 10 + WATCH 3 + DEFERRED 0), correctly
  redistributed after the 001&lt;-&gt;004 swap&quot;;
  entries_unchanged: &quot;sixteen SE-0I-WDC-001..016 present; SE-0I-WDC-012 overclaiming guard (P0/S4) and
  the standing items (002=SELC-WDC-00-005, 003=SEARG-WDC-00-005) untouched by the swap&quot;;
  change_is_additive_only: &quot;renumbering swap (001&lt;-&gt;004) + §11 corrections + correction note +
closure
  map; issue content otherwise unchanged&quot;;
  dangling_references: &quot;none – all references to the package-assembly issue now use SE-0I-WDC-004 and
  all WRF references use SE-0I-WDC-001&quot;;
  residuals: &quot;none&quot;;

red_line_check:
  self_certification_path: false
  overclaim_present: false
  relaxes_any_gate: false
  result: &quot;no red line; the backlog still carries the S4 overclaiming guard and makes no readiness
  overclaim&quot;;

conformance_position:
  role: &quot;Open-issues backlog delta for v0.1.2&quot;;
  state: &quot;content-accurate, honest, internally and cross-document consistent in its references, and
  accepted at review level&quot;;

affected_document_set_status:
  complete: true
  documents_at_pass:
    - &quot;03 (5ebbd008...) PASS&quot;;
    - &quot;04 (fcb7826e...) PASS – canonical WDC vocabulary&quot;;
    - &quot;05 (fdce8893...) PASS&quot;;
    - &quot;07 (804a8e34...) PASS&quot;;

    - &quot;09 (35b892a4...) PASS&quot;;
    - &quot;10 (bd87725d...) PASS&quot;;
  note: &quot;all seven v0.1.2 WDC affected documents are at PASS at review level; not integrated, not
  assembled, not released&quot;;

remaining_for_package_review:
- &quot;SE-0I-WDC-002 / WDC-ASM-002 – harmonize 03 and patch index annotations to the canonical 04
  vocabulary (SELC-WDC-00-005)&quot;;
- &quot;SE-0I-WDC-003 / WDC-ASM-003 – verify the 07 WRCG/CST projection crosswalk (SEARG-WDC-00-005)&quot;;
- &quot;08 §12.3 fixture package-assembly gate (canonical-only outputs, no historical aliases, no
  PASS_WITH_LIMITS)&quot;;
- &quot;SE-0I-WDC-004 / WDC-ASM-001 – assemble the package (placement, hashes, citations, internal
  consistency)&quot;;
- &quot;SE-0I-WDC-012 – boundary / nonclaim scan (S4 overclaiming guard)&quot;;
recommended_next_state:

```

```

reviewed_document: &quot;v0.1.1 accepted at review level as PASS&quot;;
action: &quot;the affected-document set is complete; proceed to the package-manifest review executing the
    remaining package-assembly gates&quot;;
decision_owner: &quot;c-gate + human anchor (a)&quot;;          # advisory only

witness_note: &gt;;
    Control-layer re-review artifact bound to reviewed_artifact.sha256, append-first over the v0.1
    record.
    Evidence of a performed re-review, not an approval or integration event.

rollback_note: &gt;;
    Supersede by a further append-first record if a later revision changes the verdict. Do not delete
    prior records;
    preserve the witness chain (v0.1 record -&gt; this record).

record_sha256: &quot;&lt;seal at integration time&gt;&quot;;

```

2. Verification summary

The two findings from SEOI_WDC_DELTA_REVIEW_RECORD_v0_1 were checked against the v0.1.1 text.

- SEOI-WDC-DELTA-REV-F1 (must-fix) — closed. The register was renumbered so SE-OI-WDC-001 is now the WRF calibration issue (matching the 03/04/05 references) and the package-assembly issue is SE-OI-WDC-004. The swap was applied consistently across §7, §9, §10, and §11, each issue retained its own priority/severity, and no dangling reference to the old numbering remains.
- SEOI-WDC-DELTA-REV-F2 (minor) — closed. The §11 attributions for SE-CONTRA-WDC-004..007 are corrected (004 -> 05, 005 -> 08, 006 -> 03, 007 -> patch index) with matching notes.

Regression: the section numbering is intact (§0..§18), the §7 counts total 16 and are correctly redistributed after the swap, the sixteen entries are present, the overclaiming guard and the standing items are untouched, and the change is additive only. No residuals were found.

3. Verdict rationale

The v0.1.1 revision closes both findings with correct fixes — a consistent renumbering that honors the accepted deltas' SE-OI-WDC-001 -> WRF references, and a correction of the scrambled §11 attributions — and introduces no regressions. No red line is present; the backlog still carries the S4 overclaiming guard. The result therefore moves from PASS_WITH_LIMITS to PASS.

This is the final affected document of the v0.1.2 WDC delta set. With its convergence, all seven affected documents (03/04/05/07/08/09/10) are at PASS at review level. The remaining work is the package-manifest review, which must execute the package-assembly gates this backlog and the SELF-EVO-09 contradiction register both record: the SELC-WDC-0Q-005 annotation harmonization of 03 and the patch index, the SEARG-WDC-0Q-005 verification of the 07 WRCG/CST projection, the 08 §12.3 fixture gate, the package assembly itself, and the boundary/nonclaim scan. None of this constitutes integration, assembly, or release; all decisions remain with c and a.

4. Closing

```

Re-review verdict: PASS (up from PASS_WITH_LIMITS).
SEOI-WDC-DELTA-REV-F1 closed by consistent renumbering (SE-OI-WDC-001 = WRF; package-assembly =
    SE-OI-WDC-004).
SEOI-WDC-DELTA-REV-F2 closed by correcting the §11 attributions. No regressions. No residuals.
Final affected document converged. All seven v0.1.2 WDC affected documents are at PASS.
Next: package-manifest review (annotation harmonization, projection verification, fixture gate,
    assembly, boundary scan).
No red line. No integration performed. Decision remains with c and a.

```
