0. Reviewer boundary statement

Produced by a bounded CGAM review worker acting as a semantic reviewer / checker. It did not author the reviewed artifact (QR-AX-01); it does not approve, integrate, or write memory (AX-03, AX-04, QR-AX-02); the verdict is advisory and final disposition belongs to the c gate and human anchor a. This is a re-review of the v0.1.1 corrected delta against the finding of SEPKT_WDC_DELTA_REVIEW_RECORD_v0_1.

2. Verification summary

The single finding from SEPKT_WDC_DELTA_REVIEW_RECORD_v0_1 was checked against the v0.1.1 text.

- SEPKT-WDC-DELTA-REV-F1 (minor) — closed. §6.3 now states explicitly that #/\$defs/nullable_string is reused from the parent 03 v0.1.1 schema and is not redefined, and adds a standalone-extraction caveat; the v0.1.1 correction note and the §18 drafting checklist reinforce it. This is more complete than the minimum (it also covers the extraction case).

Regression: the numbered header sequence is intact, the change is additive only (three traceability notes; the correction note confirms no schema fields, triggers, gate rules, or red lines changed, consistent with the unchanged schema anchors), provenance bindings are intact, and the canonical vocabulary and PASS_WITH_LIMITS prohibition are unchanged. No residuals were found.

3. Verdict rationale

The v0.1.1 revision closes the finding with a correct, additive fix and introduces no regressions; the fix also adds the standalone-extraction caveat, exceeding the minimum. No red line is present. The result therefore moves from PASS_WITH_LIMITS to PASS.

The schema delta is accepted at review level. The remaining v0.1.2 path continues with the SELF-EVO-04 WDC rule delta (vocabulary review against this schema), the SELF-EVO-08 fixture extension, the SELF-EVO-05/07 deltas, the SELF-EVO-09/10 entries, and the package-manifest integrity review before any public v0.1.2 release.

4. Closing

Re-review verdict: PASS (up from PASS_WITH_LIMITS).

SEPKT-WDC-DELTA-REV-F1 verified closed by text. No regressions. No residuals.

Schema delta 03 converged. v0.1.2 remains unreleased pending the remaining affected-doc and package reviews.

No red line. No integration performed. Decision remains with c and a.
