TSW-WDC-DELTA Review Record v0.1.1 (re-review / convergence)

Independent semantic re-review record for

05_Self_Evo_TRIAD_Sister_Witness_WDC_Delta_v0_1_2_v0_1_1

Status: Review record / control-layer artifact (advisory) — append-first supersession of TSW_WDC_DELTA_REVIEW_RECORD_v0_1

Date: 2026-06-27T08:22:51Z

Record ID: TSW_WDC_DELTA_REVIEW_RECORD_v0_1_1

Short name: TSW-WDC-DELTA-REVIEW v0.1.1

Reviewer role: semantic reviewer / checker (CGAM b-layer worker; not c, not a)

Reviewer authority: advisory only (QR-AX-02); this record is evidence, not approval, not integration, not memory write

Result: PASS

Reviewed artifact: 05_Self_Evo_TRIAD_Sister_Witness_WDC_Delta_v0_1_2_v0_1_1.md

Reviewed artifact SHA-256: fdce8893da1e8630cb382dbc972a0a7c4ffc32bb848d065943c58442904cf621

Supersedes: TSW_WDC_DELTA_REVIEW_RECORD_v0_1 (result PASS_WITH_LIMITS, reviewed sha256 c142d51a70c7f5ed5f60c324d430f823706a6ac41b6204a8cb4b1c6305450ef6)

> Status caveat (inherited from pack): private reference review record. Not a public release. Not a conformance certificate. Not deployment authorization. The prior record is not deleted; this record references it (append-first).

0. Reviewer boundary statement

Produced by a bounded CGAM review worker acting as a semantic reviewer / checker. It did not author the reviewed artifact (QR-AX-01); it does not approve, integrate, or write memory (AX-03, AX-04, QR-AX-02); the verdict is advisory and final disposition belongs to the c gate and human anchor a. This is a re-review of the v0.1.1 corrected delta against the finding of TSW_WDC_DELTA_REVIEW_RECORD_v0_1.

result: &quot;no red line; the floor-degraded route is now stricter (FAIL), not weaker; non-authority
  preserved&quot;;

conformance_position:
role: &quot;TRIAD sister-witness profile delta for v0.1.2&quot;;
state: &quot;conceptually sound, fully harmonized to the canonical 04 vocabulary, internally consistent,
  and accepted at review level&quot;;

recommended_next_state:
reviewed_document: &quot;v0.1.1 accepted at review level as PASS&quot;;
action: &quot;proceed to the SELF-EVO-07 WDC delta and the SELF-EVO-09/10 entries; then the
  package-manifest review (verify §12.3 gate / 03 + patch-index harmonization)&quot;;
decision_owner: &quot;c-gate + human anchor (a)&quot;; # advisory only

witness_note: &gt;;
Control-layer re-review artifact bound to reviewed_artifact.sha256, append-first over the v0.1
  record.
Evidence of a performed re-review, not an approval or integration event.

rollback_note: &gt;;
Supersede by a further append-first record if a later revision changes the verdict. Do not delete
  prior records;
preserve the witness chain (v0.1 record -&gt; this record).

record_sha256: &quot;&lt;seal at integration time&gt;&quot;;

```

2. Verification summary

The finding from TSW_WDC_DELTA_REVIEW_RECORD_v0_1 was checked against the v0.1.1 text.

- TSW-WDC-DELTA-REV-F1 (minor) — closed. §8.2 routes both TSW-WDC-DEGRADED and TSW-WDC-STARVED through WDC-LC-004 -> FAIL, adds a state-route precedence note subordinating the table to the canonical Local Checker result (while preserving HOLD/HUMAN_GATE for unresolved-evidence or non-material triage, and forbidding them from softening a confirmed WDC-LC-004 finding), and §10.1 adds that the canonical FAIL controls when WDC-LC-004 fires. The fix applies both the alignment and the cross-reference.

Regression: the section numbering is intact (§0..§24), the change is additive only (per the correction note, consistent with the unchanged §10/§11/§12/§13 and the implementation sketch), and PASS_WITH_LIMITS appears once as the §13.2 prohibition statement. No residuals were found.

3. Verdict rationale

The v0.1.1 revision closes the finding with a correct, additive fix that both aligns the §8.2 routes to the canonical WDC-LC-004 -> FAIL and adds an explicit precedence note, and introduces no regressions. The floor-degraded route is now stricter (FAIL), not weaker, so there is no red line. The result therefore moves from PASS_WITH_LIMITS to PASS.

The witness-profile delta is accepted at review level. It is fully harmonized to the canonical 04 vocabulary and internally consistent. The remaining v0.1.2 path continues with the SELF-EVO-07 WDC delta and the SELF-EVO-09/10 entries, then the package-manifest review (where the standing §12.3 gate and the 03/patch-index harmonization are verified).

4. Closing

Re-review verdict: PASS (up from PASS_WITH_LIMITS).

TSW-WDC-DELTA-REV-F1 closed: §8.2 DEGRADED/STARVED routes aligned to WDC-LC-004 -> FAIL plus a precedence note; §10.1 reinforces it.

No regressions. No residuals. The floor-degraded route is now stricter, not weaker.

Witness-profile delta 05 converged and is harmonized to the canonical 04 vocabulary.

No red line. No integration performed. Decision remains with c and a.
