

WDC-ASM-001 Final Assembly Record v0.1

Kotov Ivan, Bruxelles, Belgique 2026

Self-Evo WDC v0.1.2

Source file:

package_control/WDC_ASM_001_FINAL_ASSEMBLY_RECORD_v0_1.md

Academic PDF rendering from Markdown source. Content-level claims are unchanged.

Boundary: this PDF rendering does not create a conformance certificate, deployment authorization, witness-independence certification, implementation claim, or live self-evolution permission.

WDC-ASM-001 Final Assembly Record v0.1

c/a package-control record for local final assembly of Self-Evo WDC v0.1.2

Status: Final local assembly record / package-control artifact

Date: 2026-06-27T20:15:00Z

Record ID: WDC_ASM_001_FINAL_ASSEMBLY_RECORD_v0_1

Package: Self-Evo WDC v0.1.2

Author: Kotov Ivan, Bruxelles, Belgique, 2026

Gate: WDC-ASM-001 — final package placement / source map / citation map / SHA map / package assembly

Closure result: CLOSED_LOCAL_ASSEMBLY

Decision owner: c-gate + human anchor (a)

Primary boundary: local package assembly only; not public release, not DOI deposit, not conformance, not deployment.

0. Executive assembly statement

WDC-ASM-001 is closed as local document-package assembly.

The assembled package includes:

```
accepted WDC content artifacts;
review records;
patch notes;
gate verification records;
gate closure records;
package manifest;
SHA256SUMS;
CSV manifest;
README;
source map / index.
```

This record closes file-level assembly, not public publication.

1. Assembly basis

The following prerequisite package gates are closed or retained:

Gate	State	Evidence
WDC-ASM-002	CLOSED	textual harmonization to canonical 04 vocabulary
WDC-ASM-003	CLOSED	WRCG/CST projection verified
WDC-ASM-004	CLOSED	fixture surface canonical-only verified
WDC-ASM-005	CLOSED	boundary/nonclaim scan reviewed PASS
WDC-ASM-006	CLOSED_AS_RETAINED	implementation open issues retained without overclaim

2. Selected final content hashes

Artifact	SHA-256

3. Corpus bridge set

3.1 Explicit bridge: `c = a + b`

The final assembly is a `b`-layer packaging act. It organizes documentary controls around possible bounded self-evolution of `c`; it does not become `c`, does not replace `a`, and does not authorize growth.

3.2 Quiet bridge I – information theory

A package archive is a compressed state vector. The SHA map, manifest, and source map preserve which bits are active and which are nonclaims. Without them, a zip file can silently collapse review evidence into apparent authority.

3.3 Quiet bridge II – cybernetics

Assembly is a control-state transition. It moves the package from scattered reviewed artifacts to a single inspectable bundle. The transition is safe only if all gate states remain visible and no open implementation issue is hidden.

3.4 Quiet bridge III – physiology

The package is stitched and bandaged, not animated. The body of documents is coherent; implementation muscles and runtime nerves are still not attached. The chart must say that.

3.5 Earth paragraph

A handover binder can be sealed before a building is opened. It contains drawings, inspection sheets, open punch-list items, and commissioning boundaries. This assembly is such a binder: complete enough to archive and hand off, not a permission to energize.

4. Nonclaim boundary

The assembled package is ****not****:

public release; DOI deposit; conformance certificate; deployment authorization; safety proof; witness-independence certification; checker implementation certification; fixture runner execution; implementation readiness; memory write authorization; live self-evolution permission; autonomous resource-acquisition permission; personhood / consciousness / AGI / sovereignty claim.

5. Final assembly outputs

The final package directory is expected to contain:

README.md package_control/SELF_EVO_WDC_v0_1_2_FINAL_PACKAGE_MANIFEST.json
package_control/MANIFEST.csv package_control/SHA256SUMS.txt
package_control/SELF_EVO_WDC_v0_1_2_PACKAGE_ASSEMBLY_MANIFEST_v0_1_5.md
controls/gate_records/* controls/review_records/* controls/patch_notes/* docs/*

The ZIP archive hash is reported externally after archive creation. It is not embedded here to avoid self-reference.

6. Closure result

WDC-ASM-001: CLOSED_LOCAL_ASSEMBLY package_assembled_local: true public_release_authorized: false
conformance_certificate: false deployment_authorization: false
witness_independence_certification: false implementation_ready: false

7. Closing

The WDC v0.1.2 package is assembled locally as a document package. It is ready for repository placement / release-candidate review / later public-release procedure, but this record does not perform those actions.
