1. Purpose

This umbrella closes the current 07 layer as a packaged public-evidence disclosure, redaction, release, correction, and citation-surface stack.

The stack's operational formula is:

```
evidence -&gt; classify -&gt; redact/hash/withhold -&gt; claim-force ceiling -&gt; release -&gt; correction ledger -&gt; citation-surface sync
```

The core rule is:

```
public release supports scrutiny, not authority transfer.
```

2. Included Components

```

4. Claim Boundary

Allowed:

- public evidence classification architecture;
- redaction/hash/withhold boundary semantics;
- public release-bundle custody evidence;
- errata/supersession/retraction ledger discipline;
- citation-surface synchronization discipline;
- schema/checker-seed evidence, fixture evidence, and mutation evidence.

Forbidden:

- C-A1 ratification;
- legal or privacy-law certification;
- safety certification;
- deployment authorization;
- live substrate truth;
- proof of completeness.

5. Closed Layer Summary

```
07 public evidence disclosure / redaction boundary
07a disclosure manifest schema + checker seed
07b public release bundle + hash custody audit
07c public retraction / supersession / errata ledger
07d public corpus index + citation surface sync
```
